

Year 4 Spring 2022 Theme: The Lungs of the Earth!

We are learning about the rainforests and why they are important to us. We are focussing on the Amazon Rainforest including the Amazon River.

Our **Stunning Start** will begin with looking at the layers of a rainforest and the types of animals found in that habitat. We will end the day with a mini-carnival!

We are changing the way we showcase our themes, so pop back at the end of Spring term to see our End-of-theme celebration work

We will study the water cycle in more depth and look at the role of trees, as well as looking at climate change.
